

BRUNO EMURON A,
KAMPALA,
UGANDA.
24th/07/2022.

TO THE MANAGER HUMAN RESOURCE,
TECHNO BRAIN UGANDA,
KAMPALA – UGANDA.

Dear Sir,

RE: APPLICATION FOR THE POSITION OF SENIOR JAVA DEVELOPER.

I do hereby submit my application as an expression of my interest for the above-mentioned position at Techno Brain as advertised on LinkedIn.

I currently hold the post of System Developer at Centenary Bank Uganda which is a full stack development role in which I am responsible for building robust, secure systems that automate some internal bank processes and therefore help the bank save money that would have been used to purchase a solution. I am currently building a mobile application using Flutter to enable the bank's prepaid card customers to reload their cards and view the current balance and transaction history. This is an interesting project as I had never worked with Flutter before, so it has been a case of learning on job to deliver expected results.

Prior to this, I have worked as a web developer on several projects plus personal projects built using the Java Spring Boot framework gaining experience on how to implement microservice architectures, creating and consuming rest APIs and using GraphQL in web services.

I believe I am a right fit for this position not only based on the previous experience but also on the characters I possess of excellence, responsibility, and service at work. My Java web development skills have improved with every project giving me a good understanding and appreciation of the system development lifecycle, the importance of writing clean code and always learning.

I am confident that I will be a good addition to the already thriving team at Techno Brain if given the opportunity.

Yours faithfully,
Bruno Emuron A.
