TO THE GENERAL MANAGER HUMAN RESOURCE,
CENTENARY BANK,
P.O.BOX 1892
KAMPALA - UGANDA.

Dear Sir/Madam,

RE: APPLICATION FOR THE POSITION OF SYSTEM DEVELOPER.

I do hereby submit my application for the above-mentioned position advertised on 04-Feb-21.

I currently hold the post of Application Analyst within the Business Systems division a post held from September 2019. Within this position, I and my colleagues are responsible for the smooth running of the 3rd party applications the bank uses and connections to 3rd party organizations. I also write SQL scripts that are used to generate reports from the Oracle core banking database for users from time to time.

Prior to this, I have worked as a web developer on several projects one of them notably being as a System Developer contracted by Impact Outsourcing where I developed the first version of the Kenjoy Supermarket website. An e-commerce system that among other features also had cart and order management, user authentication and a backend panel for the site admins. I used PHP as the backend language and MySQL for the database.

Besides the web projects, I have also developed and deployed two Android mobile apps on the Google play store. Both apps are built using Java and constantly updated due to the dynamic and diverse nature of the Android universe.

I believe I am a right fit for this position not only based on the previous experience and studies but also on the characters I possess of excellence, responsibility, and service at work. Each project has taught me the necessity of paying attention to customer feedback and stakeholder requirements. My system development skills have improved with every project giving me a good understanding and appreciation of the system development lifecycle and the importance of writing clean code.

I am confident that I will be a good addition to the already thriving team at Strategy & Research if given the opportunity.

Yours faithfully,
Bruno Emuron A.
