TO THE MANAGER HUMAN RESOURCE,
WIKIMEDIA FOUNDATION,
SAN FRANCISCO,
CALIFORNIA – UNITED STATES OF AMERICA.

Dear Sir,

RE: APPLICATION FOR THE POSITION OF WEB MANAGER.

I do hereby submit my application as an expression of my interest for the above-mentioned position at Wikimedia as advertised on Brighter Monday.

I currently hold the post of System Developer at Centenary Bank Uganda a position held since June 2021 when it was first introduced. This is a full stack development role in which I am responsible for building robust, secure systems that automate some internal bank processes and therefore help the bank save money that would have been used to purchase a solution. Together with my colleague we were able to deliver a system that enables the credit team monitor loans disbursed on condition. This project made use of the Laravel framework, JavaScript, VueJs and PostgreSQL. I am currently building a mobile application using Flutter to enable the bank's prepaid card customers reload their cards and view the current balance and transaction history. This is an interesting project as I had never worked with Flutter before, so it has been a case of learning on job to deliver expected results.

Prior to this, I have worked as a web developer on several projects one of them notably being as a System Developer contracted by Impact Outsourcing where I developed the first version of the Kenjoy Supermarket website. An e-commerce system that among other features also had cart and order management, user authentication and a backend panel for the site admins. I used PHP as the backend language and MySQL for the database and was responsible for its management and timely updates to design or functionality as required by the owner.

I believe I am a right fit for this position not only based on the previous experience but also on the characters I possess of excellence, responsibility, and service at work. My web development and management skills have improved with every project giving me a good understanding and appreciation of the system development lifecycle, the importance of writing clean code and always learning.

I am confident that I will be a good addition to the already thriving team at Wikimedia if given the opportunity.

Yours faithfully,
Bruno Emuron A.
